

MHZ MAGNETIC FRAME

Practical. Perfect fit. Clever.

The new MHZ magnetic frame makes it quick and easy to install taut pleated blinds and DUETTE® honeycomb blinds on your windows. No drilling or screws required.

We deliver your perfectly fitting chosen blind and pre-installed in a high-quality aluminium frame. You can then attach the unit to the window frame in just a few simple steps. If necessary, for example to clean the window, you can remove the frame with a single movement. To reattach, hold it close to the window frame, and the magnetic force will do the rest.

The innovative magnetic frame is an easy-to-install and aesthetically pleasing solution for anyone who wants to enjoy optimum living comfort in the shortest possible time.

MHZ makes privacy and sun protection so easy!

Product benefits at a glance

- For DUETTE® honeycomb blinds and pleated blinds (taut blinds)
- Magnetic frame is supplied pre-assembled
- Quick, easy installation with no drilling
- Reduces side light
- Quick to remove for window cleaning
- Wide range of colours and fabrics
- MHZ exclusive design

MHZ MAGNETIC FRAME

Privacy & sun protection made easy

PLEATED BLINDS & DUETTE® HONEYCOMB BLINDS

with magnetic frame installation

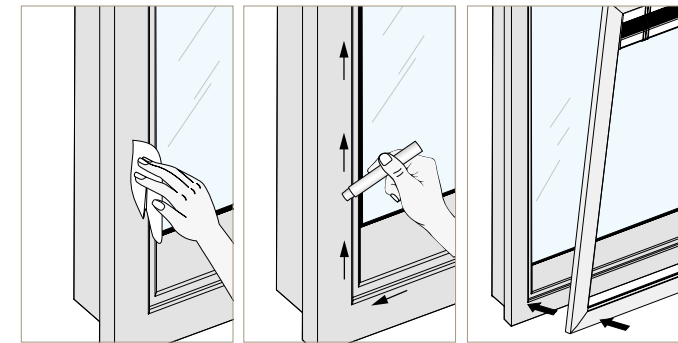

Honeycomb blind 11-5222, freely movable, MALA fabric, RAL 7040

Energy-efficient properties, a modern look and excellent blackout performance make DUETTE® honeycomb blinds a popular window covering. Combined with the magnetic frame, you have an easy-to-install privacy and sun protection system that blends in stylishly with your home.

Both pleated blinds and DUETTE® honeycomb blinds are freely movable, meaning they can be positioned exactly where you need privacy, sun or glare protection. Whether plain or patterned, transparent or with a dim-out effect, you are sure to find your own favourite among our diverse collections.

MHZ MAGNETIC FRAME

fully assembled in no time

1. Clean and dry the front of the window frame.

2. Using the primer adhesive stick supplied, draw a line around the edge of the frame.

3. Remove the protective film from the magnetic strip on the magnetic frame and press firmly onto the window frame.
